

mds ASP

TSH's versatile ERP software, MDS, is now available on an ASP Basis

TSH offers Master Distribution System (MDS) on an ASP (Application Service Provider or Timeshare) model. Having MDS-ASP allows you to enjoy all the benefits of the MDS system on a fully supported basis, without the need to commit to the purchase, installation and support of an in-house system. There are several advantages inherent to the MDS-ASP approach:

Minimal Investment. Your system is hosted on one of TSH's servers — eliminating the need for hardware investment. TSH owns and maintains the hardware. Customers connect via a secure Internet connection. In addition, there are lower startup and training costs with MDS-ASP, than purchasing an ERP system.

TSH is your data processing department. When hosting your system, TSH personnel act as your MDS system administrator. You can rely on our experienced staff to maintain, backup, and run your information systems services. No need to add anyone on your staff.

Zero Obsolescence. All of the elements that comprise the heart of the MDS system - hardware, operating system, and database as well as MDS application software - can never become OBSOLETE. TSH will maintain all elements to the latest version level. (Please note: Desktop PCs and printers at the customer site are not supplied by TSH.)

Growth. You cannot outgrow your MDS-ASP system. You can add users and services 'as-needed'. With this model, you get and pay for what you need now. Any growth requirements can easily be added on as necessary.

Conversion to in-house. With MDS-ASP, you have the option of converting to an in-house system at any time. TSH can easily move your programs and data to an on-site computer system. This allows for two different measures of growth: to add on more users to your MDS-ASP system, or to upgrade to an in-house system.

For more information on setting up your MDS-ASP system, call us at 1-800-MDS-5556, email sales@tshinc.com or fax the form below to 973-777-3063.
