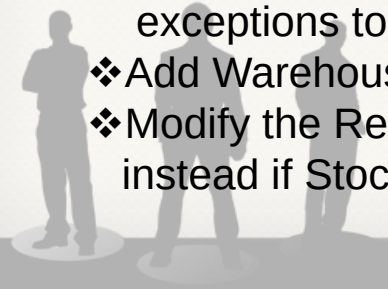
New Capabilities Added

- Accounts Payable
  - Modify Detailed Check Inquiry to show the amount transferred when using the A/P Transfer system
- Accounts Receivable
  - Modify the A/R Inquiry so the program that calls the Statement Print is in a Control record and can be customized
  - Cash Batch Type Entry/Report Example : EFT, Cash, Checks, Credit Card VISA
  - Add a prompt to Cash input/ Voucher input/ Drop Ship PO Receipts to allow you to do a lookup for allowable fiscals or hit return to take the current fiscal period
  - Modify Statements to add an option to suppress Zero balance invoices
  - Modify Dunning Letter Maintenance to use a WP style text field to allow cut and paste
- General Ledger
  - Modify the Sales Journal Entry to summarize instead of one for each Tax Jurisdiction
  - Daily / Monthly Cost Change Adjustment updates to INV.AUDIT and G/L
  - Daily / Monthly updates to GL for inventory shipped but not invoiced
  - Daily / Monthly updates to GL to allow for simple inventory accruals
  - Modify the PO/AP Tolerance update to G/L to NOT use inventory G/L# based upon parameter
  - Change GL.INQ.XREF to be an index
  - Create a new Upload program for Journal Entries

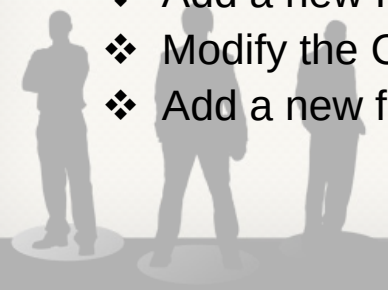
Additional Modifications

- Inquiry
  - Add a Start Date and End Date field to the Inventory Transaction by Product Inquiry
  - Add the Ship/Invoice Complete flag to the Detailed Open Orders inquiry
  - Modify the Customer Item Price Inquiry to display the Product Notes popup
  - Modify the ALL record in Lookup Options to add a field for On Order and for Std Cost
  - Create a new popup in Stock Status that will show ALL of the file costs for a Product
  - Modify the Customer Check History inquiry to add a search button
- Inventory
  - Modify Physical Inventory Tag Entry to default to the next tag# in sequence if you press return at the tag# prompt
  - Modify the Replenishment Assignment screen to add a new column for Putaway operator
  - Modify the Handheld Replenishment programs to select Transfers for Replenishment Putaway that are assigned to the Putaway operator instead of the Picker operator
  - Modify PI Tag Entry to populate the list of UMs based on the UM's used in Product Maintenance instead of having to enter any additional UMs manually
  - Modify the Avery Location label to make the Barcodes larger
  - Add a new Inventory Value at G/L Cost report to EOM. Modify Sales.2 to store new fields for OH at EOM and G/L Cost at EOM
  - Add a new field to Product Detail Maintenance for Velocity Override
  - Modify the Picking Exception Report in PowerPick to allow you to send 2 copies of the exceptions to 2 different printers
  - Add Warehouse Replenishment Transfer to the Main Inventory Menu
  - Modify the Replenishment Acceptance screen to show the transfer quantity in Case Qty instead if Stock Qty



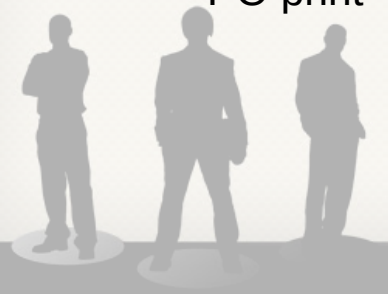
Additional Modifications 2

- Maintenance
  - Add a field for Vendor Customer number to the Vendor Detail maintenance (25X field)
  - Create and Update Google Maps/Google Visualization tool kits
  - Add a field to the Credit Memo Reason Code Maintenance for "Inactive"
  - CRM / Prospect Changes :1. Add a Base User Extension file to the Prospect Master file
  - Create a Product Number Creation program which will allow the user to fill 6 separate data elements. The data will be used to create a Product Number and Product Description and then will flow into the Product Maintenance to create the product.
  - Modify the Rebate Format Table Maintenance to show the Customer Phone#
  - Modify the Product upload to check the current load percentage and recalculate the Loaded cost if the base cost has been reloaded in the upload
  - Modify the System to tie the Inactive Product flag to the Discontinued flag so that Inactive Products can't be sold beyond what's in inventory
  - Increase customer, shipto and vendor name to 35x. Change all forms to have smaller font to handle the larger field
  - New landscape pick / pack slip
  - Add a new Processing Code for Lock Maintenance.
  - Modify the Contract Detail file import to load the UM Price matrix fields
  - Add a new field to Warehouse Zone Maintenance for Replenish at Receipt



Additional Modifications 3

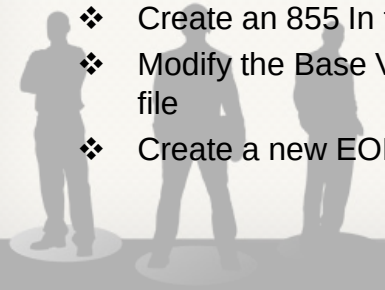
- Pricing
  - Modify the Rebateable flag in Customer Contracts to read "Use Contract" instead of "Rebateable"
- Purchasing
  - Modify the Miscellaneous Charge logic in P/O to allow for a Percentage of the total PO merchandise amount in addition to a Dollar amount
  - Change Drop Ship P/O Receipts to add field for intransit# and use and update as is being done in regular P/O Receipts
  - Modify PO Receipts to have the option to print Lot Labels
  - Modify PO Receipts to have the option of bypassing the Putaway to the Receiving Location
  - Modify the Purchase Order Receipt adjustments and the Lot Expiration Date maintenance to update the Serial.Audit file when changing a Lot Expiration date
  - The purchase order print was updated to note that a purchase order has been revised the Revision field will be updated and the last revision date is now on the PO print



Additional Modifications 4

General

- Modify the Job Scheduler to allow you to choose which Days of the Week to run when in "D" mode
- Add option to Sales Management Prospect Call (Summary) to create and save a list. Also modified the prospect blast email to allow attach files from your pc to create the blasts
- Modify MDS file purge review to purge files and update
- Add a program to turn off the system for maintenance
- Add a field in the Pedigree Authorization Maintenance screen for Signature
- EDI 844 changes
- Modify the Sales Tracing to allow each column heading and position to be specified in a maintenance
- Modify EDI 810 Drop Ship vouchering to use the Vendor's Std GL account number first then default to the GL Control record
- Modify Current Inventory Valuation Report to have an option to include all items with on hand
- Add a new Purge operator processing code. Modify all purges to use the new Purge operator code instead of "AD" or not checking at all
- Modified the Scheduler to have an option for Active Y/N. This will allow any unused jobs to be turned off when they are not being used
- Create a process on the MDS Utility menu for resizing files
- Modify the setup for MDS Default Company to have it check a field in Operator Maintenance for Default Company, If it is set then use that as the MDS Default Company. - Also add logic to default warehouse from operator
- Add Operator Processing Codes that specify whether the operator can access EOD reports and whether the operator can delete EOD reports
- Modify the Index Rebuild to display a Prompt that this process should only be run if all Users are off the system
- Create an 855 In from vendors to record shipment information
- Modify the Base Version of our 855 outbound program (order acknowledgement) to work off the Order/Pro.Forma file
- Create a new EOD Scheduler with each task broken out

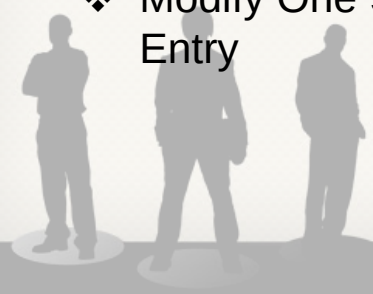


Additional Modifications 5

- System
  - Modify the Custom Screen Parameter maintenance to have an option for customizing the shifted function keys
  - Modify Source Code Control Upgrade Creation to verify that the cases entered in the list are checked in and have the upgrade flag set to Y as they are being entered
  - Change Operator maintenance to allow 20 characters
  - Additional Mods to the Help System
  - Modify SSS to send the Quick Search Menu over to WinMDS when logging on
  - Modify the new Lookup Options Maintenance to add an option to each Filter specifying whether to find the filter only at the beginning of the data fields or contained within the data fields

Additional Modifications 6

- Order Entry
  - Modify OE to display a message when an item is drop shipped but there is inventory
  - Modify Verification to allow scanning of Locations in addition to Product Numbers
  - Modify Purchase Order to allow you to manually reopen a Drop Ship PO
  - Add an EDI 832 transmission
  - Add the GP % to the Product Lookup search results
  - Modify Order Entry to add a Special Item flag to the line item screen. Any lines flagged as Special will create a standard PO at the end of the order
  - EMS Pack Mods: Add shipto to the pack maintenance for defaulting on EMS invoices
  - Add a new operator code to allow new lines to an order in Order Maintenance
  - Modify Order Entry to check a Code for Price or Cost override instead a password
  - Modify the Drop Ship PO Create to not create the PO for any Lines of an Order which is on Price Hold
  - Modify the Credit Cards to default the credit card type based on the credit card number
  - Remove Logic in MDS that checks for "L“ type lots
  - Modify the Terms field in Return Authorizations header to not skip on a new RA
  - Modify One Step Order Entry to check a different Operator Processing code than Order Entry



Additional Modifications 7

- Verification Lot Popup: Show 0 for a 0 Ship Qty instead of NULL (remove MROZ) Reduce the Ord Qty on a Lot Line if the operator zero's out the Ship Qty
- Add display of NDC#, Drug Form#, Strength and Count to: - Web Order Confirmations - Order Confirmations - Invoices - Pick Tickets - Packing Lists - Purchase Orders
- Use the Customer Inactive flag to not allow entry of a sales order, quote or cash entry if the Customer is Inactive, popup message to alert operator customer is inactive
- Added NEXT/PREV logic to item number in Ra and Credit Memo Entry
- Modify the Pick Ticket to allow it to print multiple copies in sequence. Ie, print 2 copies of page 1, then 2 copies of page 2
- Modify Invoice Update Driver to add a new routine to be used for custom programming
- Modify Pre Order Conversion. If the Special Instructions changed on the Web then add them to the Special Instructions from the Customer or Shipto when creating the Pro Forma record
- Modify the Pro Forma Conversion report to show more space for Alpha Customer#
- Modify the packslip print that if there is an overshipment instead of printing a negative number in the backorder column to print ***, then add to the last line of the line item comment section of the print ***Overshipment
- Modify the inquiries to allow for better visibility of Void Releases

Additional Modifications 8

- Modify the Warehouse to Warehouse Replenishment program to have a parameter by receiving warehouse to replenish in Selling Um or Stocking UM. Also add a parameter that says whether to backorder or to fill/kill
- Modify Credit Memos and RAs to handle Pedigree Returns
- Pick Batch update the pick.batch file with the date, time, operator and number of releases and add to the Pick Batch Inquiry
- Modify the Daily Balance Update to have the option of ignoring Pandemic Warehouses
- Modify the Picking Location program so that if the first primary doesn't have inventory then send it to the next primary location in the Product List that has inventory, if none have inventory then use the first primary
- Add Picking Alert to MDS Alerts to show what is currently in Pick in the Warehouse
- Modify the Release Processing Credit Check to not allow shipment if the Credit Hold flag is set to Y on the Customer Master
- Modify Customer Deletion to check before Deleting any Price.1 Records that are used as price contracts by any other Customers and give the Operator a warning message
- Add the overall Order GP% to the Order Entry Line Item screen
- Add support for Speedtax to Base in addition to the ESalesTax support
- Modify Order Maintenance to have the option of updating Price
- Add a new parameter for Check for duplicate orders in the last "X" days
- FOB terms will need to be prompted for during quote and order entry

Thank You
