## PRODUCT ANALYSIS REPORTS

**PRODUCT SALES SUMMARY BY WHSE-PRODUCT CLASS**

PROGRAM NAME	REPORTS NEW.PROD.SALES
SELECTION	MENU-11.1
SELECTION NUMBER	1
FILES ACCESSED	SALES.2
	WAREHOUSE
	PROD.MAST

**OVERVIEW**

The product sales report prints by warehouse, by product class, and by product, the month-to-date and year-to-date sales units/dollars, profit\$ and gross profit percentage from the Sales.2 file.

Kit items and products with the stock status indicator flagged as 'N' in the Product Master file are excluded from this report.

**OPERATING INSTRUCTIONS****PRODUCT SALES REPORT****ENTER WAREHOUSE OR 'ALL'**

Enter a specific warehouse number or 'ALL' to include all warehouses on the report. Enter 'END' to return to the menu.

**ENTER PERIOD FOR REPORT (YYMM)**

Enter the fiscal period for the report or 'END' to return to the menu.

### PRODUCT CLASS SALES INQUIRY - GRAPH

## FILE DESCRIPTIONS

### REPORTS

Sales and Inventory Report file.

### REP.PROK

Sales and Inventory Report Prok file.

### SALES.1

The Sales.1 file is a transaction journal of sales by product type. The key to the Sales.1 file is CO#: WAREHOUSE: PRODUCT TYPE: FISCAL PERIOD. As such it contains:

1. Sales dollars
2. Cost dollars
3. Return dollars

This file is also used to create a sales general ledger posting by product type. General ledger posting of sales by product type is optional. In order to make use of this feature, the following steps must be taken.

1. Parameter 13 must be set to 'Y'.
2. The Sales.1 update element must be present in the End of Day Control record (Inv.Updt) so that the Sales.1 file is updated.
3. Appropriate general ledger numbers must be loaded in the Product Type file.

Individual customers may be inhibited from updating the Sales.1 file by setting attribute 52 in the Customer Detail file to 'N'. Obviously selective updating would not be appropriate if general ledger updating based upon product type is selected.

### SALES.2

The Sales.2 file contains product history information. The key to the file is WAREHOUSE: INTERNAL PRODUCT NUMBER and contains:

1. Product sales units (24 MONTHS) this year and last year.
2. Product sales dollars (24 MONTHS) this year and last year.
3. Product cost dollars (24 MONTHS) this year and last year.

## FILE DESCRIPTIONS

### **SALES.2 (Continued)**

In addition to its use in producing various product sales history reports, this file is the source of the data used in the inventory management system.

This file is updated during the end of day process by element Iu.Sales.2005. If this file is not desired, this element can be removed from the End of Day Control record.

### **SALES.3**

The Sales.3 file contains customer history information. The key to the file is COMPANY: INTERNAL CUSTOMER NUMBER and contains:

1. Customer sales dollars (24 MONTHS)
2. Customer cost dollars (24 MONTHS)
3. A/R balance at END of month (24 MONTHS) (updated during A/R month end)

In addition to its use in producing various customer sales history reports, this file is the source of the data used in the printing of the accounts receivable customer ledger card. This file is updated during the end of day process by element Iu.Sales.3004. If this file is not desired, this element can be removed from the End of Day Control record. Individual customers may be inhibited from updating the Sales.3 file by setting attribute 53 in the Customer Detail file to 'N'.

### **SALES.4**

The Sales.4 is one of the four Customer Product Sales History files that can be generated by the system. The element Iu.Sales.4004 updates all the Product Sales History files. In the base MDS system, the key to the Sales.4 file is COMPANY: CUSTOMER: PRODUCT.

Thus, the Sales.4 file contains the lowest level detail of customer-product sales history information. It used to produce detail customer-product and/or product/customer sales analysis.

## FILE DESCRIPTIONS

### **SALES.4 (Continued)**

The information contained in this file is:

1. Sales units (24 MONTHS)
2. Sales dollars (24 MONTHS)
3. Cost dollars (24 MONTHS)

If the MDS customer does not wish to maintain this Sales file, its creation can be inhibited by setting Parameter 90 to 'N'.

Individual customers may be inhibited from updating the Sales.4 file by setting attribute 54 in the customer detail file to 'N'.

### **SALES.5**

The Sales.5 is one of the four Customer Product Sales History files that can be generated by the system. The element Iu.Sales.4004 updates the Product History files. In the base MDS system, the key to the Sales.5 file is COMPANY: SALESMAN: PRODUCT CLASS.

Thus, the Sales.5 file contains salesman summary information and is used to produce salesman profitability/performance analysis.

The information contained in this file is:

1. Sales units (24 MONTHS)
2. Sales dollars (24 MONTHS)
3. Cost dollars (24 MONTHS)

If the MDS customer does not wish to maintain this Sales file, its creation can be inhibited by setting Parameter 91 to 'N'.

Individual customers may be inhibited from updating the Sales.5 file by setting attribute 55 in the Customer Detail file to 'N'.

## FILE DESCRIPTIONS

### **SALES.6**

The sales.6 is one of the four Customer Product Sales History files that can be generated by the system. The element Iu.Sales.4004 updates the Sales History files. In the base MDS system, the key to the Sales.6 file is COMPANY: SALESMAN: CUSTOMER: PRODUCT CLASS.

Thus, the Sales.6 file contains quite detailed customersales data, and is used to produce the salesman/customer/product class sales analysis.

The information contained in this file is:

1. Sales units (24 MONTHS)
2. Sales dollars (24 MONTHS)
3. Cost dollars (24 MONTHS)

If the MDS customer does not wish to maintain this Sales file, its creation can be inhibited by setting Parameter 92 to 'N'.

Individual customers may be inhibited from updating the Sales.6 file by setting attribute 56 in the Customer Detail file to 'N'.

### **SALES.7**

The sales.7 is one of the four Customer Product Sales History files that can be generated by the system. The element Iu.Sales.4004 updates the Sales History files. In the base MDS system, the key to the Sales.7 file is COMPANY: PRODUCT CLASS.

Thus, the Sales.7 file contains company summary information and can be used to produce company and/or product class performance analysis.

The information contained in this file is:

1. Sales units (24 MONTHS)
2. Sales dollars (24 MONTHS)
3. Cost dollars (24 MONTHS)

If the MDS customer does not wish to maintain this Sales file, its creation can be inhibited by setting Parameter 93 to 'N'.

## FILE DESCRIPTIONS

### **SALES.7 (Continued)**

Individual customers may be inhibited from updating the Sales.7 file by setting attribute 57 in the Customer Detail file to 'N'.

Sales History Documentation file.

### **WAREHOUSE**

This file defines each of the warehouses used by the MDS client. A maximum of 999 warehouses may be used.

### **CUST.MAST**

One Customer Master record is maintained for each of the client's customers. Generally this file contains all static data relative to that customer such as pricing and discounting information, name and address, and various indicator fields.

### **CUST.DET**

The Customer Detail file contains one record for each customer, for each company that customer deals with. The file contains basic sales and credit history for the customer.

### **SALESMAN**

This file contains descriptive information about each salesman and stores basic performance information on each individual.

### **PROD.MAST**

The Product Master file contains one entry for each product carried by the company. Access is through the Alpha Product file. Basic descriptive information regarding the product is stored in this record such as:

1. Description
2. Product classification (TYPE AND CLASS)
3. Pricing
4. Substitution

## FILE DESCRIPTIONS

### **PROD.DET**

The Product Detail file contains an entry for each product for each warehouse in which it is stored. This file contains basic inventory, product, and product sales movement and history.

### **PARAMETER**

The Parameter file stores various pieces of information used for the processing of the MDS client.

### **COMPANY**

This file holds pertinent information for each company as defined the MDS client. A maximum of 99 companies may be defined. The company name stored in this record is used as the heading for the various reports. In addition the prompt mask and next internal number to be used for the Product and Customer files are stored in this record.
