SERVICE MENU

SERVICE MENU OVERVIEW

ACTION CODE MAINTENANCE

The Action Code Maintenance file allows for the creation and maintenance of codes that correspond with a specific action being used on a work order. The operator assigns a alphanumeric code and then enters a description of a particular action that can be taken. For example code ADJ would be used on a work order to describe that the action taken was an adjustment. The F7 inquiry key is available in this field to display a listing of codes that have been created on the system.

PARTS CODE MAINTENANCE

Similar to the action code maintenance, the parts code maintenance allows for the creation of codes that will be used to describe a specific part. Again the operator will assign an alphanumeric code and enter a description of a specific part. For example the code TRAN can be used as a code for a transistor. The F7 inquiry key is also available in this field to display a listing of codes and corresponding parts that have been created.

TECHNICIAN

The technician screen is where the operator will set up all technicians. The screen will ask for technician code which is typically the initials of the technicians and then for the full name. Use the F7 inquiry key to display a listing of all technicians on file.

FAILURE CODE

This file will be used to create codes for corresponding reasons for failure. For example code COR may be used to describe a part that has failed due to corrosion. Use the F7 inquiry key here to display a listing of failure codes.

OPEN SERVICE WORK ORDER

The Open Service Work Order file will be used to enter a request for a work order and assign a technician to the work order. The initial work order entry screen requires the input of pertinent data that relates to the work order. Such information includes the customer name, the model number of the product that needs the repair (must be a valid product number on the system), if an estimate is required before any work is to be done, if any repairs or replacements can be done on the part, as well as a brief description of the problem that has occurred.

SERVICE MENU OVERVIEW

RECEIVE WORK ORDERS

This file is typically used to record when the merchandise in need of repair has arrived at the site. Another function of this file is to document the condition of the product when it arrives, there by releasing your company of any responsibility if damage was incurred during shipment. This file also states whether this product is covered under a freight claim and if so the number of the claim.

SERVICE ORDER BY TECHNICIAN

This file provides a work order inquiry by technician. If a particular technician is entered all work orders he/she has been assigned to will display here. It is here that the status of the work orders can be changed.

WORK ORDER POSTING

The Work Order Posting file is used after the work order has been reviewed and the parts, the work needed to be done, and the cost of both have been determined by the technician. At this point, if the work order has been flagged during entry for a repair the work will be completed and the date and technician name will be entered here. After completion a release will be created.

POST INVENTORY TO SERVICE WORK ORDERS

Sometimes when posting work to a service work order, a part that is needed to complete the repair is unavailable or on back order. When this happens the inventory must be posted either from another warehouse to complete the work order or from the inventory that is entered through purchase order receipts. At any rate, when a backorder results the work order must come through this procedure before being closed out in work order posting.

ACTION CODE ENTRY AND MAINTENANCE

PROGRAM NAME	SSS.BP GEN.MASTER
	ACTION.CODE.MAINT010
SELECTION	MENU-25
SELECTION NUMBER	1
FILES ACCESSED	SVC.ACTION.CODE

OVERVIEW

This file allows the MDS user to create and maintain codes for the types of actions that have or will be used to label functions that may need to be preformed on a work order.

OPERATING INSTRUCTIONS

ACTION CODE

Enter a 3 digit alpha numeric code for the particular action. Use the F7 inquiry function to display a listing of codes that have been created on the system.

DESCRIPTION

Enter a description of what the action is.

ENTER LINE # TO CHANGE, DELETE TO DELETE , 0 TO ACCEPT

Enter the appropriate line number for a needed change, 'DELETE' to delete the code, or '0' to accept the information entered.

ACTION CODE ENTRY AND MAINTENANCE

The image shows a terminal window with a title bar containing a red, white, and blue icon and standard window controls. The menu bar includes 'File', 'Edit', 'Settings', and 'File Transfer'. The main content area displays the title 'ACTION CODE ENTRY AND MAINTENANCE' and the following text:

ACTION CODE: 3XX
1. DESCRIPTION:

At the bottom of the window is a control panel with the following buttons: HELP, END, INSERT, LDELETE, PREV PG, NEXT PG, INQUIRY, ABORT, and a button labeled 'Br k'.

PARTS CODE ENTRY AND MAINTENANCE

PROGRAM NAME	SSS.BP GEN.MASTER
	PARTS.CODE.MAINT010
SELECTION	MENU-25

OVERVIEW

This file allows the operator to enter and maintain codes associated with parts that will be utilized in the repair of an item on a work order.

OPERATING INSTRUCTIONS

PARTS CODE

Enter a 3 digit alpha numeric code to be assigned to a specific part. Use the F7 inquiry function to display a listing of part codes already established.

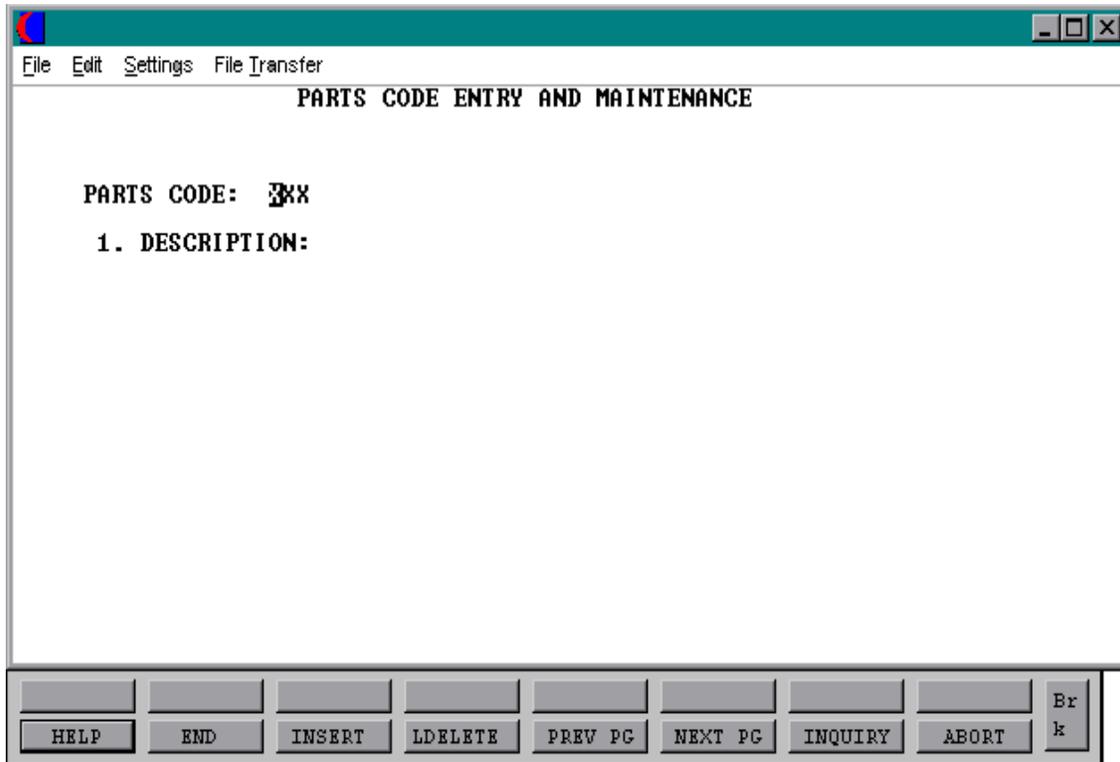

DESCRIPTION

Enter the description of the part.

ENTER LINE # TO CHANGE, DELETE TO DELETE, 0 TO ACCEPT

Enter the appropriate line number for a needed change, 'DELETE' to delete the code, or '0' to accept the information entered.

OVERVIEW

This program allows for the entry and maintenance of service work orders for customers that have items that need service (repair, replacement).

OPEN SERVICE WORK ORDER ENTRY AND MAINTENANCE

The image shows a screenshot of a graphical user interface window titled "SERVICE LOGON SCREEN". The window has a menu bar at the top with the following items: "File", "Edit", "Settings", and "File Transfer". The main content area of the window displays the following text:

SERVICE LOGON SCREEN

1.Operator **3XX**

2.Company

3.Warehouse

At the bottom of the window is a keyboard control bar consisting of several buttons: "HELP", "END", "INSERT", "LDELETE", "PREV PG", "NEXT PG", "INQUIRY", "ABORT", and a button labeled "Br k".

OPEN SERVICE WORK ORDER ENTRY AND MAINTENANCE**LOG-ON**

The log-on screen is used to validate the operator's access to the open service work order entry and maintenance module, as well as company and warehouse.

OPERATOR

The operator code entered is validated to the Operator file for access code 'WO'.

COMPANY

Enter the 2 digit company code entered is validated to the Company file.

WAREHOUSE

Enter the 3 digit warehouse number entered is validated to the Warehouse file.

OPEN SERVICE WORK ORDER ENTRY AND MAINTENANCE**OPERATING INSTRUCTIONS****ISSUED BY**

Enter the initials of the person entering the work order.

DATE

Enter the date that the work order is being entered. Hit 'RETURN' to default to the system date.

CUST #

Enter the customer number that the work order is for.

SHIP TO #

Enter the ship-to number if the default address is not the correct address.

WAREHOUSE #

Enter the warehouse number the unit will be received in. The work order number will be proceeded with the state code of the warehouse.

TERMS CODE

The customers terms will display from the Cust.Mast file. These terms can be overridden at this point.

CUST PO#

Enter the customers purchase order number if there is one.

OPEN SERVICE WORK ORDER ENTRY AND MAINTENANCE**OPERATING INSTRUCTIONS (Continued)****MODEL #**

Enter the model number of the item. Must be a valid product number in the Alpha.Prod file.

PURCHASE DATE

Enter the date the item was purchased.

PROBLEM

Enter a description of the problem with the unit.

ESTIMATE

Enter "Y" or "N" if an estimate is required.

LIMIT

Enter a dollar amount limit to the repair. Can be up to 5 numeric.

REPAIR

Enter "Y" or "N" whether to repair the unit or not.

REPLACE

Enter "Y" or "N" whether to replace the unit or not.

PRIORITY

Enter "Y" or "N". If "Y" is chosen a P will appear after the work order number on inquiries and reports.

OPEN SERVICE WORK ORDER ENTRY AND MAINTENANCE**OPERATING INSTRUCTIONS (Continued)****TECHNICIAN**

Enter technician code of the technician that is assigned to this work order. Must be a valid technician code in the file.

TAG NUMBER

Enter the tag number of the product. Tag number issued when unit is dropped off at repair site rather than being shipped in by a commercial carrier.

OVERVIEW

This file allows the MDS user to receive the items that are on the work order so work can begin. It holds pertinent information concerning the work order such as billing, shipping, and payment. It is particularly useful for keeping track of the conditions of the packages when they arrive so the company isn't held responsible for damage incurred during shipping. This option can also be used if a unit arrives without a work order having been assigned, a new work order will be opened at receipt using screen 1. The following screen logs receipt information.

SERVICE ORDERS BY TECHNICIANS

PROGRAM NAME	SERV.BP TECH.INQ010
SELECTION	MENU-25
SELECTION NUMBER	11
FILES ACCESSED	SWO
	TECHNICIAN
	TECH.XREF
	WAREHOUSE
	PROD.MAST

OVERVIEW

Service orders by technician is an inquiry. It will give a list of service work orders assigned to the technician you enter. It is here that the status of the work order needs to be changed from 'S' (on the shelf) to 'F' (on the floor) to be worked on.

SERVICE ORDERS BY TECHNICIANS

The screenshot shows a terminal window with a menu for 'WORK ORDER INQUIRY BY TECHNICIAN'. The window title bar includes 'File Edit Settings File Transfer' and a date '06/24/97'. The main area contains a form with fields for 'TECHNICIAN: JNN' and 'NAME:'. Below this is a table header with columns: LN#, ST, W/O NO, PR, RP, RL, PRODUCT NO, DATE, REC, and CUSTOMER NAME. At the bottom of the main area, it says 'ENTER TECHNICIAN OR 'L' FOR LOOKUP'. A control panel at the bottom contains buttons for HELP, END, INSERT, LDELETE, PREV PG, NEXT PG, INQUIRY, ABORT, and a key labeled 'Br k'.

LN#	ST	W/O NO	PR	RP	RL	PRODUCT NO	DATE	REC	CUSTOMER NAME
-----	----	--------	----	----	----	------------	------	-----	---------------

SERVICE ORDERS BY TECHNICIANS**OPERATING INSTRUCTIONS****TECHNICIAN**

Enter the technician code already established in the technician code maintenance program.

NAME

Name of the technician will display.

ST

The status of the work order will display here. An 'S' for Shelf or and 'R' for received will display here. Prior to being able to post the work that is done, the status will need to be changed to an 'F' for floor.

W/O NO

Work order numbers that this technician has been assigned will display.

PR

If this work order was flagged as a priority during entry a "P" will display here.

RP

If this work order was flagged "Y" for repair during entry it will display here.

RL

A "Y" will display here if the work order was flagged for a replacement during entry.

PRODUCT NO/CUSTOMER NAME

The product number and customer name for this work order will display here.

DATE

The date the work order was entered will display here.

SERVICE ORDERS BY TECHNICIANS**OPERATING INSTRUCTIONS (Continued)****REC**

The date the unit was received will display here.

ENTER LINE # TO CHANGE STATUS OR 'END' TO END

Enter the line number for the appropriate change or 'END' to return to the selector. If a line number is picked the system will then prompt:

**PUT THIS WORK ORDER ON THE FLOOR OR BACK ON THE SHELF?
(F/S/END)**

Enter a "F" to change the status of this work order to back on the floor, "S" to put the work order on the shelf, or 'END' view the inquiry screen.

WORK ORDER POSTING**OPERATING INSTRUCTIONS****WORK ORDER #**

Enter the work order number.

CUSTOMER

The customer code to whom this work order is assigned will display.

NAME

The full name of the customer will display.

TECHNICIAN

The technician who was assigned this work order will display.

MODEL#

The model number of the unit being repaired will display.

SERIAL#

If the unit had a serial number entered in the Prod.Mast file for it, then the number will be displayed. If this product has no serial number the operator will not be able to get to that field and the product will not show up on the service work order product/serial number report.

STATUS

The status of this work order will appear here. An "F" means its on the floor still being worked on . A work order with a 'S' as the status can not be posted to until the status has been changed to an 'F' through the service technician inquiry.

LOC

The warehouse location where the unit is being held will display.

WORK ORDER POSTING**OPERATING INSTRUCTIONS (Continued)****WARRANTY**

Enter either a 'Y' or 'N' to indicate whether this product is under warranty.

REPAIR

If this unit is flagged for a repair a "Y" will appear here.

REPLACE

If a "Y" appears here then the work order was flagged during entry to be replaced.

COMMENTS

This field can be used for any informal text or comments regarding services rendered to this unit.

RECV'D

The date that the unit was received at the warehouse will appear here.

PART #

Enter the part number of the unit that was used to complete the repair. If the part is on back order, then the work order must go through the post inventory to work order process before it can be marked as complete.

PCD

A "Y" or "N" will display here if there is a required expiration date.

WORK ORDER POSTING**OPERATING INSTRUCTIONS (Continued)****ACT**

Enter the action code.

FAL

Enter the failure code.

WAR

Enter "Y" or "N" if the replacement part is covered under a warranty.

U/M

The unit of measure that this product is sold in will display.

DESC

The description of the product will display.

PICK

Enter the quantity of the replacement or repair part needed for the work order. If the part is on backorder, the operator will not be able to post a complete date until the part is in.

PRICE

The product price will appear here upon entry of quantity needed.

LABOR HOURS

Enter the amount of labor hours needed to complete this repair.

LABORS PER HOUR

Enter the dollar amount for labor per hour.

WORK ORDER POSTING**OPERATING INSTRUCTIONS (Continued)****FREIGHT**

Enter the dollar amount you are charging for freight.

DATE COMPLETED

Enter the date that the work order repair was completed.

TOTAL PARTS

Enter the dollar amount total for parts needed.

TOTAL WO

Enter the dollar amount total for the work order.

ENTER LINE # TO CHANGE, DELETE TO DELETE, 0 TO ACCEPT

Enter the appropriate line number to make a change, 'DELETE' to delete the service work order, or enter '0' to accept the data that was entered.

POST INVENTORY TO SERVICE WORK ORDERS

PROGRAM NAME	SERV.BP WO.WHSE.TRANS010
SELECTION	MENU-25
SELECTION NUMBER	13
FILES ACCESSED	OPERATOR
	ALPHA.PROD
	PROD.MAST
	PROD.DET
	WAREHOUSE
	SWO
	PO
	ITEM.PO
	ITEM.BO
	KIT.MASTER
	FIFO
	RATE.EXCHANGE

OVERVIEW

This process will be used when an operator posts work that was done to the work order and a specific part that was needed for the repair is on backorder. The operator will then have to go through this procedure, either after the product was received into inventory or the operator can pick the product from another warehouses stock. After the inventory has been posted to this work order, the operator then has to go back to the work order posting process and enter a completion date so the work order can be billed.

CUSTOMER NAME - The customer name.

PRODUCT NO - The product number for the item on the work order.

OPENED - The date that the work order was entered.

OPERATING INSTRUCTIONS**SERVICE ORDERS ON ESTIMATE LIMIT HOLD INQUIRY
HIT 'RETURN' TO CONTINUE OR 'END'**

Hit 'RETURN' to proceed with inquiry, or type 'END' to return to the inquiry selector.

DO YOU WANT A HARD COPY (Y/<CR>)

If a print out of this inquiry is needed then enter a 'Y' or hit 'RETURN' if print out not required.

ENTER LINE # TO DISPLAY DETAIL OR 'END' TO END

If more details are needed then enter the line number of the work order needed and the actual work order will then display. If no more details are needed then type 'END' to return to the inquiry menu.

If a line number is selected, the work order will display and the operator will be prompted:

PRESS <CR> TO RETURN

Hit 'RETURN' to be brought back to the inquiry.

OVERVIEW

The scratch sheet reprint by number allows the operator the option of reprinting specific work orders rather than a range.

OPERATING INSTRUCTIONS

SCRATCH SHEET REPRINT BY NUMBER HIT <CR> TO CONTINUE OR 'END'

To begin the process of the reprint hit 'RETURN' to be prompted for the work order numbers to reprint, or enter 'END' to return to the reprint menu.

ENTER WORK ORDER NUMBERS SEPARATED BY SEMICOLONS (;) OR END

Enter the work order number or numbers. Each number should be followed by a semicolon, separating the different numbers being entered. To return to the reprint menu type 'END'.

SELECTION	MENU-25,16	
SELECTION NUMBER	5	
FILES ACCESSED	RELEASE	WAREHOUSE
	PARAMETER	TERMS
	CUST.MAST	PROD.MAST
	SALESMAN	SWO
	SHIP.METHOD	
	CUST.DET	

OVERVIEW

This process allows the user to print the releases that are created after the work order posting procedure is completed.

OPERATING INSTRUCTIONS

RELEASE PRINT FOR COMPLETED WORK ORDERS MOUNT FORMS AND HIT <CR> TO CONTINUE OR 'END'

To begin the printing of the releases, mount forms in the printer and hit 'RETURN', or type 'END' to return to the reprint menu.

REMEMBER YOU ARE NOW IN INSERT MODE, ENTER 'I' TO INSERT AND ENTER THE WORK ORDER # OF THE PICKS THAT YOU WANT TO REPRINT

At the colon, enter the letter 'I' to insert the work order numbers you wish to print releases for. After the entry of the number hit 'RETURN' for the next line. Continue to enter the work order numbers on the lines for as many as needed. When finished entering numbers hit 'RETURN' twice to be brought to another colon. At this colon you must type 'FI' to file the entry.

REMEMBER TO USE SP-ALIGN TO PRINT DOCUMENTS, HIT <CR>

Hit 'RETURN' after this message. At a TCL prompt type SP-EDIT and the spooler entry number displayed on the screen to print document.
