Automated Product Split by Lot for Short Dated and Specials

- This option provides the ability to split the inventory of one item into multiple items.
- This can be used to sell inventory that is near the expiration date.
- The most common use is for specials, deals, and EDI Partners, such as Pharmsaver and Surecost.

Go to Optional Systems -> Pharma Menu -> Automated Product Split by lot for Short Dated and Specials

You will be entering the information from the lot that you are moving to the short dated item. You can use the lookups on each of the fields: Warehouse, Product#, Location, and Lot Number.

When this process is completed, if the Short Dated Item does not exist, the system will create it. The new item will be the original item number preceded with an "S".

Now, when looking at the product lookup, you will see the new short dated item with the inventory, along with the lot and expiration date information.

The Pedigree is also updated.

When looking at the new pedigree, we have updated the Notes section alerting you to the transfer. Additionally, the Inbound pedigree information from the original pedigree is also transferred.
