## **Pharma Information Email List**

**Stay on top of the latest requirements**

As many of you may be getting questions or have concerns about your compliance and changing rules to the DSCSA and Pharma specific issues,

We have created this list to outline how the MDS system will help you address these challenges.

## **FDA Announces Enforcement Discretion Guidance for DSCSA Verification Requirement**

Today, the Food and Drug Administration announced a [final guidance](#) regarding enforcement of the Drug Supply Chain Security Act (DSCSA) requirements for wholesale distributor verification of saleable returned products and dispenser verification of the product identifier for suspect and illegitimate product.

- **FDA does not intend to take action against wholesale distributors who do not, prior to November 27, 2023**, verify a product identifier prior to further distributing returned product as required under the DSCSA. This provides wholesale distributors three additional years to comply with this requirement.
- **FDA also does not intend to take action against dispensers who do not, prior to November 27, 2023**, verify the product identifier for suspect or illegitimate product in the dispenser's possession or control. This provides dispensers three additional years to comply with this requirement.

Please contact [drugtrackandtrace@fda.hhs.gov](mailto:drugtrackandtrace@fda.hhs.gov) with questions about this announcement.

Having said that, We still need to address the issue , we just have a little more time.

The goal of this email list is to point out our suggested best (business) practices.

While we do not enforce or force you to follow these rules, this list is intended more as a guide to allow you to decide internally how you might want to update your practices and systems.
