## **Incorrectly Charged Customer Tax**

This method will correctly reflect in your Tax Registers. We are basically entering the item two times.

The first line item will be marked as taxable, and the second line item as non taxable.

First, if the Customer is marked as non-taxable, you will need to temporarily change that. That can be changed in Customer Master Maintenance, field #27.

Second go to Credit Memo Entry

From the Main Menu go to #1 Customer Service, then #1 Order Entry and Invoicing, then #8 Credit Memo Processing.
