Suspicious Order Monitoring System

(Excessive Product Usage)

- Typically used to monitor and control the quantity of controlled substances sold to a customer
- Can also be used for customer allocations to limit the amount of stock customer's can order. By doing this, you will be able to fulfill multiple customer orders, instead of one customer wiping out your stock
- This is constantly being updated, as we now have expanded the options for its usage:
 - By specific customer
 - By specific product family
 - By specific product

Excessive Product Usage Maintenance

Pedigree Lot Transfer Posting

- New option to sell inventory that is near the expiration date
- This option provides the ability to split the inventory of one item into multiple items
- A new pedigree is created for the newly created, short dated item
- Pricing and Costing can be different than the original item. One reason, the different price and cost will not affect the original item
- Most common use is for specials, deals, and EDI Partners, such as Pharmsaver and Surecost

Pedigree Lot Transfer Posting

The screenshot displays a software interface for 'Pedigree Lot Transfer Posting'. The main window shows a form with the following fields:

- Warehouse: 001 THE SYSTEMS HOUSE, INC.
- Product#: 13668-0137-05 Escitalopram Oxalate 20mg tab 500
- Location: A-001
- Lot Number: [masked]

A table titled 'On Hand in Warehouse' is displayed, showing the following data:

Lot#	Type	OnHand	Recvd Dt	Exp Date	Pedigree
3F1D03D	P	390	05/24/16	09/30/16	00000001016
W1JD21	P	270	05/23/16	12/31/18	00000001015

Below the table, there are fields for 'On Hand in Location' and 'Quantity Moved'. A text box at the bottom of the screenshot states: 'In this example, the first lot is expiring shortly.'

The interface includes a menu bar (File, Edit, Settings, Reset, Tools, Mode, Standard Functions, Special Functions, Refresh Dashboard, Help) and a toolbar with icons for Help, Ok/End, Insert, Delete, Prev, Next, Inquiry, Cancel, Off, and Popup. The status bar at the bottom shows 'The Systems House | Operator:SY1 Ready.' and the date/time '5/26/2016 13:39'.
